"Jacqueline Ripstein enlightened message through art is the universal information needed to calm the current explosive turmoil of people around the world. Her Art combines composite artistic skills with crystal impregnated paint to produce a luminescence beyond the light of the great masters. Her paintings are profound, full spectrum consciousness experiences." Dr Valerie Hunt. Prof. Emeritus UCLA. Scientist.

"Jacqueline has discovered the logic within the Harmonic Oscillators that allows the decoding of all information that flows from the Universe into us through our senses. Our perception expands. When we contemplate Jacqueline's Art, it may seem as if time stops."

Scientist Rafael Lopez Guerrero President & Founder of FET (Fundación EticoTaku for Innovation.) Spain.

I could never have imagined that during my artistic career a mystical journey would unfold before my eyes. That I would work with certain unseen and higher dimensions of energy and colors. Visibility, after all, depends on the eyes of the observer and the instruments used. What we physically observe is very limited, which of course limits us in viewing the vastness of Creation. Thus, feelings, thoughts, and emotions may also be classified as existing within the "Invisible" fields.

My goal in creating New Invisible Art Techniques has been to reveal these unseen dimensions and to offer a breath of hope to our humanity by showing from where we create our lives, as the inner Light beings that we truly are. "I

have realized that my art becomes a doorway, a portal to Invisible realms, connecting the viewer to emotional healing and spiritual power." To inspire people and help make a difference in their lives is my breath of Life.
